As an intern in Network Infrastructure Engineering, I'll dive into various facets of managing and operating network systems. My tasks will revolve around configuring and maintaining devices like routers, switches, and firewalls. Under supervision, I'll contribute to network design and implementation projects, troubleshoot issues, and assist in documentation. I'll also learn about network monitoring tools and security measures, gaining practical experience in their application. Collaboration with team members and active participation in training sessions will enrich my learning journey in networking.
