Rejeenald Flores

Python Developer
Caraga, Philippines

Summary

I've been immersed in Python for programming and software development since 2014, with a focus on web development and crafting crawlers for websites. My approach is rooted in Test Driven Development and Clean Code Principles. Presently, I'm actively engaged with APIs like Amazon SPAPI, MWS, SKUVault, ShipStation, and InkSoft, continuously refining and enhancing existing scripts tailored for these platforms. My passion for learning is evident in the self-taught mastery of the skills outlined in this profile. I graduated Magna Cum Laude and earned the Best Paper Award at a National conference during my master's program. I'm seeking a company where mutual growth is prioritized, fostering an environment where both parties can thrive collaboratively.

Experience

Smartish
IT/Python Developer
March 2022 - Present (2 years 10 months)
Austin, Texas, United States

IT support. Develops, maintains, and improves automation scripts using different APIs.

Father Saturnino Urios University
