Jason Llanes

Flutter Developer | Mobile Application Developer | Web Developer |
Quality Assurance
Cagayan De Oro City, Northern Mindanao, Philippines

Summary

As a Mobile Application Developer, I create and maintain Android
applications for various clients. I have a bachelor's degree in
information technology from STI College, where I learned the
fundamentals of programming, web development, and database
management. I have more than two years of work experience in
the field of mobile application development, using Java and other
technologies to build user-friendly and functional apps. I also have
teaching experience, as I was a course instructor at MyCode,
where I taught children how to create simple games using Scratch.
I enjoy applying my skills and knowledge to solve problems, create
value, and empower users. I am passionate about learning new
technologies, sharing my expertise, and collaborating with others. I
am always looking for opportunities to improve my skills, expand my
network, and contribute to the growth and innovation of the industry.
