Allan Murillo

Software Developer | Freelancer at Upwork | Windows Desktop
Development
Makati, National Capital Region, Philippines

Summary

Hi there, I'm Allan – your go-to Desktop Applications Developer and
Website Developer with an impressive track record spanning over 4
years. I've taken on a diverse range of projects, each a testament to
my commitment to excellence and innovation.

Projects and Achievements:

Developed a robust Accounting System that streamlined financial
operations for an Accounting Firm, boosting efficiency and accuracy.
Engineered a Dental Clinic Management System, enhancing patient
care and appointment scheduling.
Engineered a Database System for InTouch Philippines, empowering
reports data-driven actions.
Created a Computerized Payroll System for a Guards Agency,
simplifying payroll management for enhanced workforce satisfaction.
Implemented a Billing and Collection System that optimized revenue
tracking and management.
Crafted a Working Trial Balance System, providing real-time
financial insights.
Developed an Employee Management System for HR operations.
Designed a Membership Management System to organize data.
Created a Patient Record Management System to ensure organized
data.
Engineered an Inventory Management System for streamlined stock
tracking and inventory control.
Designed an Invoicing Application System for easy and accurate
billing processes.
Developed engaging Static Websites for a Skincare Company and a
Security Agency Company, enhancing their online presence.

Key Strengths and Skills:

Expertise in C#.NET and VB.NET, delivering robust and scalable applications.
Proficiency in Microsoft SQL Server 2022, ensuring seamless data management.
Mastery of Visual Studio 2022, for efficient development and project management.
Skilled in SAP Crystal Reports, presenting data insights in a visually appealing manner.
UI Design Skills that result in user-friendly and visually engaging interfaces.
Experience with DevExpress and DotNetBar, for enhanced application functionality.
Proficient in MySQL, SQLite/MS Access, ensuring efficient data storage solutions.
Adept at Testing and Debugging, resolving errors swiftly to ensure smooth user experiences.
Proficiency in PHP, HTML/CSS, and WordPress for versatile web development.
MS Excel prowess, facilitating data analysis and visualization.

Why Choose Me:
My passion for delivering exceptional solutions combined with my ability to adapt to client requirements sets me apart. Let's transform your vision into reality. I'm here to exceed your expectations. Reach out, and let's create something extraordinary together.

Experience

Upwork
Freelance Software Developer
January 2023 - Present (2 years)
United States

As a remote freelancer working on multiple projects on Upwork, my job responsibilities would typically include:

Understanding project requirements: Before starting work on any project, you will need to thoroughly understand the project requirements and specifications provided by the client.

Designing and developing the application: Depending on the project, you will be responsible for designing and developing different components of the application.

Testing and debugging: Once you have developed the application, you will need to thoroughly test it to ensure that it is free from bugs and errors.

Providing support: After delivering the completed project.

Here are some brief application descriptions for my projects:

1. Dental Clinic Management System: This system would be designed to help dental clinics manage patient information, appointments scheduling, sending SMS/email to patients, and billing and payment, generating reports such as AR, Sales, and expenses. It might include features such as a patient database, appointment scheduling system, billing system, and reporting capabilities.

2. Invoicing Application French Language: This application would be designed to help French-speaking businesses create and manage invoices. It might include features such as invoice templates, automatic calculations, and the ability to generate reports on outstanding invoices.

3. Church Membership Management System: This system would be designed to help churches manage their membership database, events, and communication with members. It might include features such as a member database, event scheduling system, communication platform, and reporting capabilities.

4. Substicare Management System for Patient Medical Details: This system would be designed to help medical professionals manage patient medical details. It might include features such as a patient database, medical history tracking, appointment scheduling system, and communication capabilities.

Acosta, Del Rosario & Associates CPAs
Software Developer
January 2021 - December 2022 (2 years)
Makati, National Capital Region, Philippines

Creator of accounting systems, payroll, and billing system: responsible for designing and developing software solutions that meet accounting, payroll, and billing needs of clients or organizations.

Database administrator: responsible for maintaining and optimizing databases, ensuring security, reliability, and accessibility for the appropriate parties.

IT support specialist: responsible for providing technical support to users, troubleshooting software and hardware issues, maintaining computer systems and peripherals, and providing guidance and training to ensure effective use of technology.

Software developer, working all around: responsible for designing, developing, testing, and maintaining software solutions for a variety of needs in the organization, utilizing various programming languages and tools.

HMBS
